PROFILE

I am Aamir Sohail, a passionate Frontend Developer with expertise in HTML, CSS, JavaScript, and React.js. I specialize in crafting responsive, modern, and user-friendly web applications that deliver seamless digital experiences. With hands-on experience in Bootstrap, I focus on building efficient and visually appealing interfaces that enhance overall UI/UX. I am also proficient in Firebase for backend integration and GitHub for version control, which allows me to collaborate effectively within dynamic development teams. Driven by continuous learning and problem-solving, I aim to contribute to innovative projects that create meaningful impact.

WORK EXPERIENCE

Fresh Graduate(2021-2025)
Univeristy Final Year Project(Online Food ordering System)
Description:
A web-based application designed to simplify the process of browsing, selecting, and ordering food online. The system allows users to explore menus, add items to the cart, and place orders seamlessly with a responsive and user-friendly interface. Built with HTML, CSS, JavaScript, and React.js, the project ensures smooth navigation and an engaging user experience. Integrated Firebase for authentication, real-time database management, and order storage. The system also supports order tracking and secure data handling, making it a reliable and efficient solution for online food services.
Frontend Developer(self learning project)

- Online Food Ordering System – Developed a responsive web application for browsing menus, adding items to cart, and placing orders. Built with HTML, CSS, JavaScript, React.js, and Firebase for real-time order management and authentication.
- Hospital Management System – Designed a web-based solution to manage patient records, doctor schedules, and appointment bookings, ensuring efficient data handling and user-friendly navigation.
- Doctor Appointment System – Built an application to schedule, update, and track doctor appointments with integrated notifications and secure authentication.
- Golden Form – Created a modern, responsive form system with validation, clean UI, and Firebase integration for secure data submission and storage
